KRISTEE

I spoke with Kristee Wittrig, Nuclear Fuel Services in Atlanta(770) 662-8405. She said not to panic, Nuclear Fuel Services has every intention of maintaining a surety for this project. The cancellation came because Nuclear Fuel Services is taking their banking business elsewhere. She will mail & fax us a letter stating these intentions. They should have the replacement surety posted prior to the expiration date of December 31, 1996. I will be calling her back to give her the new surety amount & discuss forms for surety.

I called Kristee Wittrig back & she explained some more details regarding the surety. It seems a computer generated letter failed to reach Nuclear Fuel Services which then caused the computer to kick out the cancellation letter. I told her of the new reduced amount \$141,800 and the need for new forms. I'll be faxing her a copy of the Division 4/15/96 letter to Al Dearth describing the new surety amount. She will still be faxing us a copy of the explanation letter. We will be sending the surety forms to her just in case they DO change banks.
